## SUPPORTED BY

Singapore Radiological Society

## ORGANISED BY

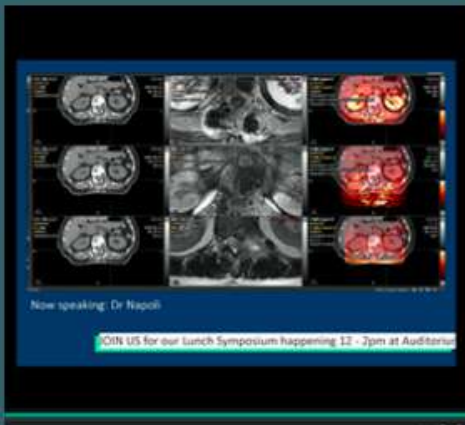

# SINGAPORE ON-TARGET (SPOT) CONTOURING SERIES 2021 AUGUST 14-15 SAT & SUN

Our inaugural SPOT Contouring Course features a scientific program collaboration between NCIS Radiation Oncology Department and Asian Alliance Radiation & Oncology (AARO) to cover the essentials in Post-operative Target Delineation.

The course will cover common cancer sites requiring adjuvant radiotherapy including brain, spine, head and neck, breast, prostate and gynaecological cancers. Each session will begin with talks by a multidisciplinary team of surgeons, radiologists and radiation oncologists, followed by hands-on small group contouring sessions. All participants will be given access to the platform prior to the course with a pre-selected case for target delineation from the comforts of their homes.

Be part of a Multi-disciplinary panel discussion which will include:

- Practical applications of international contouring guidelines to the regional patient population
- Guidance from radiologists, surgeons and radiation oncologists

## A MULTI-INSTITUTIONAL COLLABORATION

### Scientific Co-Chairs

**Dr Bala Vellay**  
Consultant  
Radiation  
Oncologist

**Dr David Tan**  
Consultant  
Radiation  
Oncologist
