

# SPOT HALL OF FAME

## Winner of the Best Contours PROSTATE SUB-SITE

### DR TANUN JITWATCHARAKOMOL

Radiation Oncologist  
Siriraj Hospital, Thailand

Please give us a brief introduction about yourself.

Hi, my name is Tanun Jitwatcharamol. I'm a 1st year Radiation Oncologist at Siriraj Hospital, Thailand. I'm 28 years old this year. My field of interests are brain and head/neck malignancy. I'm also interested in advanced radiation techniques such as proton or carbon as well.

Why did you decide to register for the SPOT Contouring Workshop 2021?

As I mention, I still need more practice in this field due to a lack of experience. The fastest way is to attend the international conference such as SPOT. I believe that learning from the expert and be guided by them is the fastest way to become one of them one day.

Share with us what was most satisfying/meaningful to you about your participation in the pre-course contouring exercise.

The program for contouring is quite easy to use. For me, it is the first time I am using the MIMs software for contouring, however because of the well-designed program good data that it provides. I can easily catch up and send my contour to SPO.

Describe any painful experiences you have had (if any) in the course of this exercise, and how you overcame them.

I was contouring for the head and neck session, and then my internet connection was lost. All my contours were gone forever. What a painful moment. I didn't overcome it. I did not send in another contour for the head and neck session. Haha

What did you think your chances were of winning the contouring competition, and how did you feel when your name was announced during the prize-winners ceremony?

I once presented the morning session about the updated contouring guidelines about post-op cervix and endometrium in my department. So, was quite confident during that contour. However, I won for prostate contour. At first, I was quite surprised, but then I was so happy. Thank you Dr. Pittaya Dankulchai for teaching me so well about that. Thank you SPOT again for this reward.

**"I believe that learning from the expert and be guided by them is the fastest way to become one of them one day."**

What advice would you give to participants of future SPOT courses to increase their chances of winning the competition?

First of all have stable internet connection, and then read the updated contouring guideline first before start contouring.
